

EMBARGOED UNTIL END OF PRESS CONFERENCE

NEXT STEPS IN OUR TRANSITION TOWARDS COVID RESILIENCE

The local COVID-19 situation has remained stable even as we eased our community measures on 10 August 2021. This was possible only because of strong public support and adherence to the safe management measures, robust and effective testing and tracing, and high vaccination rates.

Local Situation Update

2. Vaccination continues to be a key part of our efforts to keep the community situation under control. As of 17 August 2021, 77% of our population has completed their full regimen/ received two doses of COVID-19 vaccines, and 82% has received at least one dose. There is clear evidence that vaccination can significantly reduce severe illnesses and deaths. Among the infected cases, almost 9% of the unvaccinated needed intensive care or oxygen supplementation and around 1% were deceased, whereas only 1.3% and 0.1% respectively of the vaccinated did so. This is a substantial difference in terms of negative outcomes.

3. There has been a steady decline in cases since Phase 2 (Heightened Alert) was reintroduced on 22 July 2021. As of 17 August 2021, the number of new local cases has halved from an average of 123 cases per day about two weeks ago, to 63 cases per day in the past week. For the past two weeks, the number of cases that were isolated before detection has remained stable at around half of the total cases detected, while unlinked cases similarly remained stable at around a quarter of the total cases.

4. **Given the stable situation, we will continue as planned with the second step in the easing of community measures starting from 19 August 2021.** The easing involves mainly increasing the size of masked-on events and religious services, and will not have significant risk impact. Please refer to **Annex A** for the details¹.

Piloting Home Isolation as a Care Model for Fully Vaccinated COVID-19 Patients without Severe Symptoms

5. Our high vaccination rates also enable us to review our treatment and care model for COVID-19 patients. With much more local and global data showing that fully vaccinated COVID-19 patients have a much lower risk of developing severe disease, we are piloting a home-centric care model for the management of COVID-19 patients with mild or no symptoms, thus requiring minimal supportive care. However, they need

¹ There is no change from what was announced on 6 August 2021.

EMBARGOED UNTIL END OF PRESS CONFERENCE

to have a suitable home setting, where they can be isolated from the rest of their household.

6. The Ministry of Health (MOH) will pilot the Home Isolation model for medically stable COVID-19 patients from **30 August 2021**. We will start this initiative in a risk-calibrated, phased manner. The patients and their household members must both be fully vaccinated and must not belong to any vulnerable groups, such as the elderly or immunocompromised. This is in line with the recommendations of the World Health Organization (WHO) and the best practices of other developed countries. These patients will spend the first few days in a medical facility, before moving to home isolation. By then, the viral loads of vaccinated patients would have dropped.

7. During Home Isolation, the patients and their household members are required to remain in their place of residence, and this will be tracked through electronic monitoring and surveillance checks through phone calls. The patients will be closely monitored for their health and safety during this time and will be provided with access to 24/7 telemedicine services. They will also be subject to a Polymerase Chain Reaction (PCR) swab on the ninth day of illness to determine if they could be discharged from isolation, provided their swab result is negative or if they carry a very low viral load. All household members will need to be fully-vaccinated, come under home quarantine, and also be placed on a daily Antigen Rapid Test (ART) testing regimen for early detection of potential infection.

8. We will closely monitor the pilot's outcomes, and study if more patients may benefit from this mode of recovery in a safe manner.

Opening our Borders Carefully for Incoming Travellers

9. On 6 August 2021, the Multi-Ministry Taskforce announced that border restrictions would be progressively reviewed to facilitate more travel when conditions allow. Our higher population vaccination rates now give us the foundation to introduce vaccination-differentiated border measures for travellers from countries/regions that have controlled the pandemic well and also vaccinated large parts of their population.

10. As a first step, we have reviewed the country/ region classifications for our border measures. Countries/ regions will be classified in one of four categories, each with differentiated border measures, premised on a traveller's 21-day travel history prior to their entry into Singapore. If the traveller visits or transits through countries/ regions in different categories, the most stringent set of requirements among those countries/ regions will apply. The updated classification, together with the associated testing requirements, can be found in **Annex B** and on the [SafeTravel website](#).

- a. Category I – Travellers from countries/ regions in this category can enter Singapore without having to serve a Stay-Home Notice (SHN). They will only be subject to an On-Arrival COVID-19 PCR test², and if negative, will be allowed to go about their activities. This would include countries/regions

² To expedite the COVID-19 PCR test at the airport, travellers are strongly encouraged to register and pre-pay for their on-arrival COVID-19 PCR test prior to departing for Singapore at <https://safetravel.changiairport.com/>.

EMBARGOED UNTIL END OF PRESS CONFERENCE

such as Mainland China (excluding Jiangsu province), New Zealand and Taiwan today.

- i. We have reviewed the COVID-19 situation in Hong Kong and Macao, and will also add them to this category from **20 August 2021, 2359 hours**. See [Annex C](#) for details.
- b. Category II – Travellers from countries/ regions in this category will be required to undergo a 7-day SHN, which can be served at their accommodation of choice. Singapore Citizens, Permanent Residents and Long-Term Pass Holders may serve their 7-day SHN at their place of residence, if conditions are suitable. Currently, only Mainland China (Jiangsu province) is in this category.
 - i. We have reviewed the COVID-19 situation in **Australia, Canada, and Germany**, and will add these countries/ regions to this category from **20 August 2021, 2359 hours**. We have also reviewed the COVID-19 situation in Brunei, and will place them in this category from **20 August 2021, 2359 hours** (see [Annex C](#)).
- c. Category III – Unvaccinated travellers from countries/ regions in this category will be required to undergo a 14-day SHN at dedicated SHN facilities. Travellers who are fully vaccinated³ may apply to opt out of dedicated SHN facilities and serve their 14-day SHN at a suitable accommodation of their choice, if they fulfil the criteria in **Annex D**. Currently, **Austria, Italy, Norway, the Republic of Korea and Switzerland** are in this category.
 - i. We have reviewed the COVID-19 situation in **Belgium, Denmark, Japan and Luxembourg**, and will add these countries/ regions to this category from **20 August 2021, 2359 hrs**.
- d. Category IV – Travellers from all other countries/ regions (except Bangladesh, India, Myanmar, Nepal, Pakistan and Sri Lanka, where entry is currently not allowed⁴) will be required to undergo a 14-day Stay-Home Notice (SHN) at dedicated SHN facilities. Travellers will also be required to comply with the testing regime as indicated in [Annex B](#).

Starting Vaccinated Travel Lanes

11. Beyond the above framework, we will implement a new Vaccinated Travel Lane (VTL) to facilitate fully vaccinated persons to travel into Singapore under reduced border measures. We will start pilot VTL arrangements with **Brunei and Germany**. In lieu of SHN, these vaccinated travellers under the VTL will undergo multiple COVID-19 PCR tests, including a pre-departure PCR test within 48 hours of their scheduled departure for Singapore, an on-arrival PCR test upon arriving in Singapore, and two

³ An individual is considered fully vaccinated two weeks after he or she has received the full regimen of Pfizer-BioNTech/ Comirnaty, Moderna or other WHO EUL vaccines.

⁴ Only Singapore Citizens and Permanent Residents with travel history to Bangladesh, India, Myanmar, Nepal, Pakistan and Sri Lanka are allowed entry into Singapore.

EMBARGOED UNTIL END OF PRESS CONFERENCE

additional PCR tests on Days 3 and 7 of their stay in Singapore (if they have not left yet).

12. The number of VTL travellers will be limited by available flights, dedicated to the scheme. VTL travellers must also travel on non-stop designated flights to Singapore.

13. Prior to travelling to Singapore, short-term visitors and Long-Term Pass Holders who wish to travel under the VTL will need to apply for a Vaccinated Travel Pass between 7 and 30 days before their intended date of entry into Singapore. **Applications for the VTP will start from 1 September 2021 for travel into Singapore from 8 September 2021.** Returning Singapore Citizens and Permanent Residents who are vaccinated will automatically qualify and will not need to apply for the VTP in order to travel under the VTL. The Civil Aviation Authority of Singapore will provide more details.

14. As the global situation evolves, we will continue to adjust our border measures in tandem with our roadmap to becoming a COVID resilient nation. Any changes to border measures will be updated on the [SafeTravel website](#). Travellers are advised to visit the website to check the latest border measures for the associated country or region before entering Singapore.

Recognising Overseas Vaccinations with WHO EUL Vaccines for Vaccination-Differentiated Safe Management Measures

15. Currently, only Singapore Citizens, Permanent Residents and Long-Term Pass Holders with vaccination records in Singapore's National Immunisation Registry are eligible for vaccination-differentiated safe management measures. All other incoming travellers would have to obtain a negative pre-event test (PET) by a MOH-approved test provider that will be valid for a 24 hours, in order to be eligible for vaccination-differentiated safe management measures.

16. From **20 August 2021, 2359 hours**, the Immigration and Checkpoints Authority (ICA) will issue a tamper-proof vaccination sticker ([Annex E](#)) to be affixed onto the passport of newly arrived travellers⁵ who were fully vaccinated overseas with a WHO-Emergency Use Listing (EUL) vaccine, and who can furnish a valid, English-language vaccination certificate. These travellers will be eligible for vaccination-differentiated safe management measures if they produce their passport with the valid tamper-proof sticker affixed. To obtain this sticker, travellers should produce their English-language vaccination certificates to ICA officers at the Singapore immigration checkpoints upon arrival. By September, the IT systems will also be enhanced so that travellers, upon verification of their eligible vaccination status at entry, will also be recognised by SE Biz App through their TT Apps/Tokens to be eligible for vaccination-differentiated safe management measures without needing to go through PET.

⁵ These include Singapore Citizens, Permanent Residents, Long-Term Pass Holders (LTPH) and Short-Term Visit Pass holders from all countries/regions (i.e. Category I, II, III, IV).

Embarking on the Next Phase of our National Vaccination Programme

17. While a large proportion of our population is now vaccinated, we are planning ahead to ensure that our population continues to be well protected from COVID-19 and its new variants as they arise. The Expert Committee on COVID-19 Vaccination (EC19V) has been reviewing and monitoring the local and overseas data on vaccine boosters and is developing recommendations on Singapore's booster strategy.

18. The EC19V is also looking at the need to enhance the immune response of certain groups of individuals. This includes the severely immunocompromised who have a weaker immune response to vaccination despite completing a full vaccination regimen. For this group, there may be benefits in administering a third dose of the vaccine for them. The EC19V will make its recommendations shortly.

Working Together Towards COVID Resilience

19. Our high vaccination coverage has allowed us to ease some of our community measures and take significant steps towards a new normal of a COVID resilient nation. Yet, there are some, in particular our seniors, who can be vaccinated but have not done so. We urge them to walk into any of our vaccination centres to get vaccinated, so as to protect both themselves and their loved ones. It is only together, that we can emerge safer and stronger.

Shopping malls and showrooms	Occupancy limit of one person per <u>16 sqm</u> of Gross Floor Area (GFA)	Occupancy limit of one person per <u>10 sqm</u> of GFA
Sports/ exercise activities and classes provided by gyms/ fitness studios	<ul style="list-style-type: none"> • Indoor mask-off high-intensity activities and classes capped at <u>30 persons</u> <ul style="list-style-type: none"> ○ Indoor mask-off activities at gyms/fitness studios to resume in groups of up to <u>5 persons</u> if all individuals are vaccinated* (SportSG will provide more details on the provision for children 12 years and below) 	[No change]

EMBARGOED UNTIL END OF PRESS CONFERENCE

	<u>Current measures for transition from 10 August to 18 August</u>	<u>Measures for transition from 19 August onwards</u>
	<ul style="list-style-type: none"> • Indoor mask-on and all outdoor (mask-on and mask-off) activities and classes capped at <u>50 persons</u> <ul style="list-style-type: none"> ○ In groups of up to <u>5 persons</u> for mask-on indoor activities and all outdoor activities only, irrespective of vaccination or test status 	
Tour groups	<ul style="list-style-type: none"> • Up to <u>20 persons</u> per tour for all tours 	<ul style="list-style-type: none"> • Remain at <u>20 persons</u> for non-conveyance tours • Up to <u>50 persons</u> for conveyance tours (Duck Tours etc.)

*An individual is considered vaccinated if he/ she has been: a) fully vaccinated, i.e. received full regimen of Pfizer-BioNTech/Comirnaty, Moderna or WHO EUL vaccines, with an additional two weeks for the vaccine regimen to be fully effective, b) recovered from COVID-19, or c) has obtained a negative result on a pre-event test taken in the past 24 hours before the expected end of the event.

^The provision for children 12 years and below (i.e. born in and after 2009) will only be applicable to higher-risk mask off activities and large-scale events, e.g. F&B dine-in, gyms.

- If there is more than one child in the group, all children must be from the same household. Other vaccinated individuals* can be from different households as the child(ren).
- For large-scale events, the number of children is capped at 20% of the actual event size.

	Country/Region Classification for Recent 21-day travel history (CAA 19 Aug)			
	Category I	Category II	Category III	Category IV
Countries / Regions	Hong Kong, Macao, Mainland China (except Jiangsu province), New Zealand & Taiwan	Australia, Brunei, Canada, Germany & Mainland China (Jiangsu province)	Austria, Belgium, Denmark, Italy, Japan, Luxembourg, Norway, Republic of Korea & Switzerland	All other Countries/Regions*
Border Measure[^]	On-Arrival Test	<ol style="list-style-type: none"> 1. On-Arrival Test 2. 7-day Stay-Home Notice (SHN) at place of accommodation 3. Day 7 SHN exit Polymerase Chain Reaction (PCR) test 	<ol style="list-style-type: none"> 1. Pre-Departure Test within 72 hours 2. On-Arrival PCR Test 3. 14-day SHN at dedicated SHN facility or place of accommodation (if criteria fulfilled) 4. Day 3, 7 and 11 Antigen-Rapid Test (ART) self-swab test[#] 5. Day 14 SHN PCR test 	<ol style="list-style-type: none"> 1. Pre-Departure Test within 72 hours 2. On-Arrival PCR Test** 3. 14-day SHN at dedicated SHN facility 4. Day 3, 7 and 11 ART self-swab test[#] 5. Day 14 SHN PCR test

[^]Countries/Regions may have vaccination-differentiated border measures. Please check the [SafeTravel website](#) for details.

* All long-term pass holders and short term visitors with travel or transit history to Bangladesh, India, Myanmar, Nepal, Pakistan and Sri Lanka are still not allowed to enter Singapore, as per MOH's press releases on 22 and 30 Apr 2021.

**Travellers from identified Countries/Regions will have to undergo an on-arrival ART test in addition the on-arrival PCR. Please check the [SafeTravel website](#) for details.

[#]The cost of ARTs would be \$40 (inclusive of GST) for 4 kits per person serving SHN aged 3 years old and above in the calendar year. ART swabbing is required for travellers serving SHN at dedicated SHN facilities.

Long-Term Pass Holders (LTPHs) with passes issued by the Ministry of Manpower (MOM) may have to comply with additional requirements and measures.

Only Non-Singapore Citizens, Permanent Residents and LTPHs from Category I countries/regions may enter Singapore for short-term visits unless separately announced.

Travel Conditions for Travellers from Brunei, Hong Kong and Macao

Brunei

We had earlier announced that travellers from Brunei will be allowed to go about their activities in Singapore, without a need to serve Stay-Home Notice (SHN), if their on-arrival COVID-19 Polymerase Chain Reaction (PCR) test results are negative.

2. Given the increased cases observed in Brunei, we will be tightening border control measures for travellers with travel history to Brunei. From **20 August 2021, 2359 hours**:

- a. Singapore Citizens (SCs), Permanent Residents (PRs) and Long-Term Pass holders entering Singapore with travel history to Brunei, within the last 21 days before departure for Singapore, will be subject to an on-arrival COVID-19 PCR test, a 7-day SHN at their place of residence, and a COVID-19 PCR test before the end of the SHN period.
- b. Short-term travellers holding an Air Travel Pass (ATP) with travel history to Brunei, within the last 21 days before departure for Singapore, will not be allowed to enter Singapore.

Hong Kong and Macao

3. We had earlier required travellers from Hong Kong and Macao to undergo a 7-day Stay-Home Notice (SHN), which can be served at their place of residence if suitable or their choice of accommodation⁶. They will also be subjected to an on-arrival COVID-19 PCR test and another PCR test before the end of their 7-day SHN.

4. We have since reviewed the COVID-19 situation in Hong Kong and Macao, and will make the following changes:

- a. From **20 August 2021, 2359 hours**, all travellers entering Singapore from Hong Kong or Macao, and who spent the last 21 days there before departure for Singapore, will undergo a COVID-19 Polymerase Chain Reaction (PCR) test upon arrival, and will be allowed to go about their activities in Singapore if the PCR test result is negative. They will not need to serve a 7-day Stay-Home Notice (SHN) period.
- b. Short-term visitors who spent the last 21 days at Hong Kong or Macao before departure for Singapore, can apply for an Air Travel Pass with immediate effect, for entry into Singapore on or after 26 August 2021. They will undergo a COVID-19 PCR test upon arrival and will be allowed to go about their activities in Singapore if the PCR test result is negative.

⁶ Singapore Citizens, Permanent Residents and Long-Term Pass Holders may serve their 7-day SHN at their place of residence, that they or their family members own or are sole tenants of, or in suitable accommodation such as a hotel or serviced apartment.

EMBARGOED UNTIL END OF PRESS CONFERENCE

- c. Travellers who are already serving their 7-day SHN at their place of residence as of 20 August 2021, 2359 hours will still be required to complete their 7-day SHN and exit swab. They will be subjected to an on-arrival COVID-19 PCR test⁷ and another PCR test before the end of their 7-day SHN.

⁷ To expedite their on-arrival COVID-19 PCR test at the airport, travellers are strongly encouraged to register and pre-pay for their on-arrival COVID-19 PCR test prior to departing for Singapore at <https://safetravel.changiairport.com/>.

Criteria to Opt out of Serving Stay Home Notice (SHN) in Dedicated SHN Facilities

From **20 August 2021, 2359 hrs**, all fully vaccinated travellers⁸ from **Austria, Belgium, Denmark, Italy, Japan, Luxembourg, Norway, the Republic of Korea and Switzerland** may apply to opt out of dedicated SHN facilities and serve their 14-day SHN at their respective places of residence (e.g. residential address) or at other suitable accommodation (e.g. hotels or serviced apartments). Applications will be considered if the vaccinated traveller has fulfilled the following criteria:

- a. Remained in the above-mentioned countries⁹ in the last consecutive 21 days prior to arriving in Singapore; and
- b. Are occupying their respective places of residence or other suitable accommodation alone, or only with household members who are also vaccinated persons¹⁰ serving SHN with the same travel history and duration of SHN.

2. For Singapore Citizens (SCs) and Permanent Residents (PRs), the application must be made three days prior to arrival via the [SafeTravel website](#). Travellers who are not SCs or PRs may apply to opt out as part of the entry application process from **20 August 2021, 2359 hrs** onwards. All travellers must present the approval to opt out upon arrival in Singapore. All travellers who successfully opt out must remain in their declared place of residence/accommodation at all times and are required to don an electronic monitoring device throughout their SHN period. Action will be taken against those who breach the requirements of the SHN or make false declarations. Travellers will also be required to utilise specially designated transport services to and from their place of residence and bear the costs¹¹ for these transport arrangements.

⁸ An individual is considered fully vaccinated two weeks after he or she has received the full regimen of Pfizer-BioNTech/ Comirnaty, Moderna or WHO EUL vaccines.

⁹ Including these countries/regions: Australia, Brunei Darussalam, Canada, Germany, Hong Kong, Macao, Mainland China, New Zealand and Taiwan (correct as at 19 Aug 2021).

¹⁰ Vaccinated travellers of the same travel party with unvaccinated minors (aged under 12 years old) can also apply to opt out of their SHN at SDF to serve together at their place of residence or other suitable accommodation. The unvaccinated minors will be subjected to the prevailing testing regime (i.e. children aged 3 years old and above will undergo a D14 PCR).

¹¹ Transport is estimated to cost about \$200-220 in total for travel from checkpoint to place of residence and roundtrip for COVID-19 test before end of SHN.

Illustration of the vaccinated sticker
